Ethernet Switch HARTING mCon 7100

Ethernet switch, managed, for harsh industrial environments; including interface to external configuration memory

General Description

If additional services for networks in harsh industrial environments (filtering, prioritisation, topology), or individual network configurations are required, then the Fast Ethernet switches of the product family HARTING mCon 7100 come into play.

These managed switches allow the connection of up to 10 end-units over IEC 802.3 Shielded Twisted-Pair cabling. Protection class, temperature range and mechanical stability satisfy the highest requirements. These Fast Ethernet switches can therefore be directly used in industrial environments.

They support both:

SNMP and an easy Web-Interface for management functions.

Features

- Ethernet switch acc. to IEEE 802.3
- Store and Forward Switching Mode
- 10 Ports, managed, non blocking
- Auto-Crossing, Auto-negotiation, Auto-polarity
- Ethernet (10 Mbit/s) and Fast Ethernet (100 Mbit/s)
- Diagnostic LEDs (Link status, Data, Power, Error)

Advantages

- High Degree of protection IP 65 / IP 67
- Robust metal housing, zink die-cast
- Can be used directly in industrial environments
- EMC, temperature range and mechanical stability meet the highest demands
- Integrated management functions

Application fields

- Industrial automation
- Automotive industry
- Wind power
- Power distribution systems
